PACKET PROJECT PROPOSAL

Protocol You'll Be Investigating (abbreviation): _____

Protocol (Full Name) : _____

Port Number(s) used by that protocol: _____

Is that port number reserved for an application? Yes   No

Did you check to see if that application is still in use today? (For example, the AOL Instant Messenger <AIM> program is defunct)? Yes   No

You'll need to investigate an application associated with that protocol. Specifically, you'll need to provide detail on how that application is transported in the application layer. What application will you be investigating further?

_____

You'll need to track the packets sent across the internet from your home computer to your home router to at least one router on the web to the final server your application will be interacting with.

How much detail do you plan to provide on the travel that packet makes?

_____

_____

Do you plan to emphasize the travel/route of the packet or the application transport? _____

What problems do you anticipate in this project?

- _____
- _____
- _____
- _____
