

MR W Addendum to Baylor University Lap Requirements

- 1) There are a number of sig fig errors in that example. .007 is NOT 3 sig figs!!!
- 2) Yes, you really do need to include your partners' last name on your title page
- 3) DO NOT do any graphs by hand... use Logger Pro or Google or Excel (I have links for those) or Desmos
- 4) Use the section at the back (page 13) to calculate error propagation when adding/subtracting
- 5) Use the section in the back (page 13) to calculate error propagation when multiplying/dividing
- 6) DO NOT go through the gyrations of calculated "Standard Error as described on page 13
